

# My Family

The link to My Family allows you to view your student's information quickly.

- You can view the Recent Activity for each student (Recent Activity is a compilation of all updates to Class Room Web Pages).
- A list of links to each of your student's teachers and classes provides quick access to move to those Teacher Profiles and Class Room Web Pages.

Your students will appear on the same **My Family** page regardless of which school in the district they attend.

Other options can be set from this page. Note that subscribing to the email notification about assignments does not guarantee an announcement of every assignment since many assignments and tasks will not be technology related and may not be posted to a teacher's classroom web page.
